1 Documentation for authors using L^AT_EX

If you are writing with L^AT_EX please observe the following guidelines:

- Use Unicode encoding for your files (i.e., for XeL^AT_EX or LuaT_EX)
- Use the standard features of L^AT_EX as documented in the standard manual, *L^AT_EX: A Document Preparation System* by Leslie Lamport, or in *The Very Short Guide to Typesetting with L^AT_EX* by Peter Flynn and Silmaril Consultants (part of the T_EXlive distribution and at [CTAN](#)).
- Use logical markup, not presentational markup. That means you mark things as `\chapter{xxx}`, `\footnote{xxx}`, `\sanskrit{xxx}`, `\title{xxx}`, etc., and not `\textbf{xxx}`, `\vspace{5ex}`.
- Do not use `\newcommand` or `\def` to make private commands. If this appears to be unavoidable, please contact the journal editor before proceeding.
- Provide your bibliography entries in BibT_EX format. The journal uses BibL^AT_EX, which is flexible. So please do not use any special formatting commands or non-standard bst files. Just use `\cite{xxx}` etc. in the simplest manner.
- If you have tables, keep them simple and don't spend time putting in many horizontal and vertical lines. They will be reformatted for the journal, in any case.

The above advice is also given on the [HSSA website](#).

2 Documentation for L^AT_EX hackers converting incoming files to HSSA

2.1 Prelims

Start off each HSSA article L^AT_EX file with the following macros:

```
\RequirePackage{snapshot}  
\documentclass{hssa}  
\usepackage{hssa}  
\addbibresource{\jobname.bib}
```

Note that the article's bibliography should have the same name as the article, with the extension .bib.

2.1.1 Metadata

Next, use the following commands to capture the metadata for this article:

```
\HSSAissuenum{999}  
\HSSAissuedate{2999}  
\HSSAarticletitle{A Title}  
\HSSAauthorname{A. N. Author}  
\HSSAauthoraddress{University of University}  
\HSSAfirstpage{000}  
\HSSAlastpage{999}  
\DOI{1.2/3.4.5}
```

These commands generate the right text for the front page, the copyright page and the article's title and running header.

If the running header is too long (author's love long titles), use

```
\HSSAshortarticletitle{An abbreviated title}
```

2.2 HSSA user macros

Here follow various commands for use in HSSA articles that aren't part of standard L^AT_EX.

2.2.1 AD, BC, etc.

\CE There are shortcuts for expressing the eras CE and BCE. These macros also
\BCE

get the fonts right. There are synonyms: use any of the following and the output will look right:

\bce
\BC
\BCE
\%
\ce
\CE
\AD

Don't forget to handle the space after these macros appropriately.

\q Use this to make a loud, obnoxious marginal note in bright yellow box. Use it to annotate the PDF proofs for communicating with the author.

\q{} stands for "query," and is a tailored version of `todonotes`. In addition to the yellow box in the margin, it can also build a page index of the notes that you can print at the end of the article with `\listoftodos`.

2.2.2 Environments for śloka and mini-editions

`miniedition` (*env.*) An environment for making apparatus notes to a single śloka or two.
`sloka` (*env.*) An environment for typesetting Sanskrit verses; pretty much the same as `verse`.

2.2.3 Citing manuscripts

\MScite Cite your manuscripts using the pattern "City, Library, accession number." The \MScite macro will print the right thing in your text, while also writing an entry to an alphabetical index of manuscripts that appears at the end of your article. Saying `\MScite{London, Wellcome, α999}` will print "MS London, Wellcome α 999 in your text.

\MS \MS is a synonym for \MScite

\MSnocite If you want to put an entry in your index of manuscripts, but you don't want the entry printed in the main text where you're writing, use \MSnocite.

\MSsilent A synonym for \MSnocite.

2.2.4 Making a lexical index

\saneng If you say `\saneng{pūpa}{cake}` then you'll get "cake (*pūpa*)" printed in your main text. Also, an entry will be written to a lexical page index, both Sanskrit-English and English-Sanskrit.

`\ssaneng` `\ssaneng` is a silent version of the same macro that writes the index entries but puts nothing in the main text.

2.2.5 Language-switching

`\textgreek` See the documentation for [Polyglossia](#) for details of how these are used.
`\textenglish` These macros switch to the respective languages and scripts (e.g., Devanagari for `\textsanskrit`}).
`\dev` `\dev` is just an abbreviation for the `\textsanskrit` macro.
`\cjk` This is just a switch, so say `{\cjk X}` where X is a Chinese character.

2.2.6 Citation commands

HSSA uses the Bib_{La}T_EX macros, and the Oxref style for formatting according to the Oxford Hart's Rules guidelines. The NatBib conventions are also loaded, so you can use `\cite`, `\citep` `\citet` in the standard ways, as well as Bib_{La}T_EX's `\footcite`, `\cites`, `\parencites`, etc.

2.2.7 Bibliography and index outputs

Say `\printbibliography` at the end of the document.

Here are examples from the end of Speziale's 2019 paper that do more elaborate things.

Index prologue

```
\setlength{\shorthandwidth}{.25\textwidth}

\indexprologue{\centering\emph{References are to page numbers in this
article.}}
```

Index of manuscripts As indexed using `\MScite` etc.

```
\printindex[manuscripts] % ditto for manuscripts

\printshorthands % uses features of biblatex-manuscripts-philology
[title=Primary Sources in Manuscripts,
type=manuscript,
% env=details,
% sorting=special,
]
```

Index of editions

```
\printshorthands %  
[title=Primary Sources in Printed Editions,  
keyword=edition, % flagged as such in the bib file  
%prenote=blurb01,  
%sorting=special,  
]
```

Index of references

```
\printbibliography  
[title=Secondary Sources and Translations,  
sorting=nyt,  
%keyword=secondary,  
notkeyword=edition,  
nottype=manuscript,  
] % keep the editions in the Text Editions section only
```

2.2.8 Miscellaneous

`\diatop` Puts more than one accent over a letter. This isn't available in standard L^AT_EX, but we philologists sometimes need it. Say, for example, `\diatop[\'|{\o}]` to get \acute{o} .

`\PreliminaryNote` For that zeroth footnote at the beginning of an article that gives acknowledgments or abbreviations. I prefer to put this material at the end of an article, in a section called "Acknowledgements."

2.2.9 Rotating pages for big tables and figures

`rotating (env.)` That's pretty much it.

You might want to add `\usepackage[figuresright]{rotating}` if you have some tables to go sideways.

2.3 Standard L^AT_EX sectioning and similar commands

`\section` Just use the normal `\section{}` commands, down to `\paragraph`.

`\lettrine` The first line after a section is formatted with an initial drop-cap and small caps, using `\lettrine`. The three arguments are 1. line-drop and over height (always the same), 2. the drop-capital itself, and 3. the remaining

letters of the word and some more words up to the end of a phrase. For example

```
\lettrine[lines=2,loversize=.1]{T}{he} object of this contribution is ...
```

How much you include in the phrase is up to you. E.g.,

```
\lettrine[lines=2,loversize=.1]{T}{he object of this contribution} is ...
```

Note that *all* the letters of the phrase should be lowercase. They will be turned into small caps, and uppercase letters won't look right. E.g.,

```
\lettrine[lines=2,loversize=.1]{T}{he mahābhārata and the rāmāyana both feature kṛṣṇa  
%% ...
```

2.4 What you get for nothing

In addition to setting up the above commands, the class and style files below will handle the

- colour and layout of the front and back matter,
- the title and section headings,
- the running headers and footers,
- the two-column footnotes
- the use of T_EX Gyre Pagella or other Unicode font in T_EX math mode.

3 Macros in the class file for the HSSA journal: hssa.cls

This is `hssa.cls` by Dominik Wujastyk, a class file for the HSSA journal.

The documentation is created by running `hssa-documentation.dtx`, which calls `hssa.cls` and `hssa.sty`, etc.

See <http://tug.org/pracjourn/2005-3/asknelly/> for a nice statement of the difference between `.cls` and `.sty` files. Here in `hssa.cls`, I'm keeping the code that is part of the core of HSSA's design. I would not expect to change things here much after 2019.

```
\NeedsTeXFormat{Declare that we are using the main LATEX2e format.
1 \NeedsTeXFormat{LaTeX2e}

\LoadClass{HSSA is based on an 11pt article style:
2 \LoadClass[11pt]{article}

3 \usepackage{hssa-indexing} % has to be loaded before hyperref
4 \RequirePackage{ %

6     amsmath,
7     amsfonts,
8     amssymb,

13    hyperref,
14    geometry,

16    longtable,
17    polyglossia, % polyglossia calls fontspec
18    multicol,
19    booktabs, % better table spacing, \toprule etc.
20    textcase, % to get \MakeTextLowercase for tweaking the running footer
21    fancyhdr,
22    hssa-biblatex, % bibliography management and formatting
23 }

xcolor Settings for the xcolor package
24 \RequirePackage{xetex,
25     dvipdfmx,
```

```

26    hyperref,
27    svgnames,
28    table]
29    {xcolor}

```

`enumitem` To control the spacing around itemized lists.

```

30 \usepackage{enumitem} % supersedes mdwlist: does it globally
31 \setlist{noitemsep,
32    %labelindent=\parindent,
33    %leftmargin=*,
34 }

```

`\q` Issue notes to the author in the margins of the page proofs. It uses the `todonotes` package.

Define `\q` to be `\empty` for the final run to suppress the display of notes. Put a `\newpage \listoftodos` just before `\end{document}` to help the author with an indexed list to the marginal notes.

```

35 \setlength{\marginparwidth}{2cm} %todonotes manual, section 1.6.5
36 \usepackage[colorinlistoftodos,
37 %    disable,
38 textsize=tiny,
39 loadshadowlibrary,
40 shadow,
41 backgroundcolor=yellow]{todonotes}
42 \setuptodonotes{fancyline}
43 %
44 \newcommand{\q}[1][{}]{\todo{#1}}

```

`\PreliminaryNote` A preliminary numberless “footnote” for abbreviations, grant references, and other general initial statements. But commonly, put this in a little “Acknowledgements” section at the end of the paper.

```

45 \newcommand{\PreliminaryNote}[1]{%
46    {\def\thefootnote{\relax }%
47      \footnotetext{\hspace*{-2.3em} %only if not using \hangfootnotes
48        #1}}}
49 %
50 %DW ?
51 \skip\footins=24pt
52 %DW ?

```

3.1 Set the geometry for the pages

`geometry` Set the geometry for the pages DW

```

53 \geometry{twoside,
54  paperwidth=210mm,
55  paperheight=297mm,
56  textheight=562pt,
57  textwidth=384pt,
58  centering,
59  headheight=30pt,
60  headsep=18pt,
61  footskip= 42pt, %24pt,
62  footnotesep=24pt plus 2pt minus 12pt,
63 }

```

3.2 Front matter

```

\title I thought about doing something like this:
\author \newenvironment{frontmatter}{}{\maketitle}
\date but then gave that up.

\title
64 \title{\LARGE \@HSSAarticletitle }

\author Put the author's address in a parbox because it may have hard linebreaks
(\\) that can cause trouble. This happened in Speziale 2019. I still don't
know why the linebreak is allowed after the authorname but not in the ad-
dress.
65 \author{\@HSSAauthorname\\ [1ex]
66  \parbox{\textwidth}{\small\centering\emph{\@HSSAauthoraddress}}
67 }

\date No date.
68 \date{\relax }

```

3.3 Running headers and footers

```

\HSSAfooter Variable that collects the text for the footer.
69 \def\HSSAfooter#1 %*%
70  {\gdef\@HSSAfooter{#1}}

\@HSSAtitle Define the title for use on the title page.
71 \newcommand{\@HSSAtitle}{History of Science in South Asia}

\HSSAverso Variable that collects the page header of the verso pages.
72 \def\HSSAverso#1{\gdef\@HSSAverso{#1}}

```

`\HSSArecto` Ditto for the recto, and initialize them both to nothing.

```
73 \def\HSSArecto#1{\gdef\@HSSArecto{#1}}
74 \let\@HSSAverso\@empty
75 \let\@HSSArecto\@empty
```

Now the HSSA journal running headers, footers and cover citation. Set the shorttitle to be the same as `\HSSAverso` unless the author redefines it in the document preamble.

```
76 \HSSAverso{\@HSSAarticletitle }
77 \let\HSSAshorttitle\HSSAverso
78 \HSSArecto{\@HSSAauthorname }
```

`\@HSSAheaderfooterfont` Set up the font that will be used for running headers and footers. Small caps, and a bit of extra space, 7%, of the font's point size, between each letter (LetterSpace is from fontspec).

```
79 \def\@HSSAheaderfooterfont{\scshape\addfontfeature{LetterSpace=7}}
```

`\HSSAfooter` Use the `\MakeTextLowercase` macro from the textcase package and construct the running footer for each page.

```
80 \HSSAfooter{\MakeTextLowercase{\@HSSAtitle}\ \@HSSAissuenum\
81      (\@HSSAissuedate) \thefirstpage--\thelastpage}
```

3.4 Fancy headers and footers

Now the fancy header setup, which should be done after the geometry setup.

```
82 %\usepackage{fancyhdr} % after the geometry setup
83 \pagestyle{fancy}
84 \fancyhead{}
85 \fancyhead[CO]{\textenglish{\@HSSAheaderfooterfont\MakeTextLowercase{\@HSSArecto}}}
86 \fancyhead[CE]{\textenglish{\@HSSAheaderfooterfont\MakeTextLowercase{\@HSSAverso}}}
87 \fancyhead[RO]{\textenglish{\@HSSAheaderfooterfont\thepage}}
88 \fancyhead[LE]{\textenglish{\@HSSAheaderfooterfont\thepage}}
89 \fancyfoot[L]{}
90 \fancyfoot[C]{\textenglish{\@HSSAheaderfooterfont\@HSSAfooter}}
91 \fancyfoot[R]{}
92 \renewcommand{\headrulewidth}{0pt}
93 \renewcommand{\footrulewidth}{0pt}
```

3.5 Fancy-plus-DOI style

`\fancypage` Make a style for the first page that has the DOI in the bottom right

```

94 \fancypagestyle{fancy-plus-DOI}{%
95 \fancyhead{}
96 \fancyhead[R]{}
97 \fancyfoot[L]{\copy\cclogobox\ \tiny\textenglish{\@HSSAheaderfooterfont
98 \href{http://doi.org/\@DOI}{doi: \@DOI}}}
99 \fancyfoot[C]{\textenglish{\@HSSAheaderfooterfont\@HSSAfooter}}
100 \fancyfoot[R]{}
101 }

```

3.6 Link colours

`\definecolor` This is the colour that will be used for the URL links; it's dark, so that it doesn't disturb the reading as much as the standard blue would do. It depends on the `xcolor` package.

```
102 \definecolor{darkbrown}{rgb}{0.4, 0.26, 0.13} % from http://latexcolor.com/
```

3.7 Output the preliminary matter

These commands depend on `hyperref`, but that is always loaded so there's no need to check.

```

\AtBeginDocument
103 \AtBeginDocument{%
104 \coverpage
105 \copyrightspage
106 %
107 \setcounter{page}{0}
108 \maketitle

```

It would have been convenient to `\input{sanskrit-hyphenations}` at this too, but for some reason this doesn't work. These hyphenations have to be

`\input after \begin{document}.`

3.8 Output the final pages that come after the article

```
\AtEndDocument
122 \AtEndDocument{%
123     \newpage
124     \coverlastpage
125 }
```

3.9 Arrange the appendix

```

127 %
128 \def\appendixname{Appendix}
129 \renewcommand\appendix{\par
130     \setcounter{section}{0}%

5 Biblatex settings for HSSA

This code is in the file `hssa-biblatex.sty`.

5.1 Manuscript-oriented Bib_{La}T_EX macros

We don't need this at present. It's only here as a place-keeper, as a starting point in case we have a document that requires lots of specialized bibliographies for manuscripts, e.g., perhaps a manuscript catalogue.

```
558 % \usepackage[%  
559 % tools={manuscripts},  
560 % bibstyle={authoryear},  
561 % ]{biblatex-multiple-dm} % for biblatex-manuscripts-philology
```

5.2 Load Biblatex

Here are the macros for our bibliographies. HSSA uses *New Hart's Rules* (Oxford University Press, 2014) as its formatting style guide. These Rules are comprehensively implemented for Bib_{La}T_EX through the `oxref` and `oxyear` packages. See also section 5.3 below.

```
562 \usepackage[%

601 mvreference]{useeditor=true,usetranslator=true}
602 \AtBeginDocument{\assignrefcontextentries[]{*}}

```

See [Cikitsā blog post](#) for further explanation of the above.

5.4 Bibliography punctuation

Following sections 3.10 and 4.7.5 of the Bib_{La}T_EX manual, put the comma *inside* the quotation marks of the title.

```

603 \DefineBibliographyExtras{british}{\DeclareQuotePunctuation{.,}}

```

5.5 Bibliography sorting

To avoid saying `\newrefcontext[sorting=nyt]` before `\printbibliography` in every document redefine `\printbibliography` (from `biblatex.sty`):

```

604 \renewrobustcmd*{\printbibliography}{%
605   \newrefcontext[sorting=nyt] % added this line
606   \begingroup
607   \delimcontext{bib}%
608   \edef\on@line{\on@line}%
609   \@ifnextchar[%

```

```

610     {\blx@printbibliography}
611     {\blx@printbibliography[]}
612 }

```

5.6 Positioning of the notes

To make bibtex notes print last, like addendums from [Stackexchange](#).

```

613 \DeclareSourceMap{
614     \maps[datatype=bibtex]{
615         \map{
616             \step[fieldsource=note, final]
617             \step[fieldset=addendum, origfieldval, final]
618             \step[fieldset=note, null]
619         }
620     }
621 }

```

5.7 csquotes

The american option with csquotes gives double quotes in article titles in the bibliography.

```

622 \usepackage[style=american]{csquotes}

```

5.8 Tweak the citation style

Remove the “p.” and “pp.” from, for example, \volcite :

```

623 \DefineBibliographyStrings{english}{%
624     page          = {},
625     pages         = {},
626     volume = {vol},
627     volumes = {vols},
628 }

```

5.9 Unused code

Biblatex documentation 4.11. and macros from biblatex.def Enable hot URLs for PDFs at Archive.org and Academia.edu etc.

Make URLs smaller:

```

629 %\DeclareFieldFormat{url}{\textsc{url:} {\small \href{#1}{\nolinkurl{#1}}}}

6 Indexing for HSSA

This code is in the file `hssa-indexing.sty`.

Formerly used `xindy`; now updated to use `xindex`

```
711 \usepackage[imakeidx]{xindex}
712 % \PassOptionsToPackage{nonewpage}{imakeidx}
713 %
714 \indexsetup{level=\section*,
715     noclearpage,
716     firstpagestyle=fancy
717 }
718 %
719 \makeindex[name=lexical,
720 title=Lexical Index,
721 columns=3,
722 options= --config iast --no_casesensitive --noheadings, % nocasesensitive,
723 %noheadings
724 ]
725 %
726 \makeindex[name=manuscripts,
727 title=Index of Manuscripts,
728 options= --config iast --no_casesensitive --noheadings,
729 columns=1]
730 %
```

Before the `\printindex` command say
“`\indexprologue{References are to page numbers.}`”

6.1 English-Sanskrit indexes

Command for English words to be followed by Sanskrit in parentheses, and both to be sent to the lexical index.

```
\saneng
731 \newcommand{\saneng}[2]
732 % #1 = Sanskrit
733 % #2 = English
734 {#2 (\sansk{#1})%
735     \index[lexical]{#2!#1@\emph{#1}}%
736     \index[lexical]{#1@\emph{#1}!#2}}
```

`\ssaneng` A “silent” version of `\saneng` that sends items to the index but prints nothing in the main text.

```
737 \providecommand{\ssaneng}[2]% silent index entry
```

```

738 % #1 = Sanskrit
739 % #2 = English
740 {\index[lexical]{#2!#1@\emph{#1}}}%
741     \index[lexical]{#1@\emph{#1}!#2}}

```

Tidy up the index spacing:

```

742 \renewcommand\@idxitem{\par\hangindent 15\p@ }% from sanmed.sty

```

7 Commands for citing and indexing manuscripts

\MS

```

743 \newcommand{\MS}[1]{MS #1\index[manuscripts]{#1}}
744     \let\MScite=\MS

```

And a silent version (data to index; nothing in text):

```

745 \newcommand{\MSsilent}[1]{\index[manuscripts]{#1}}
746     \let\MSnocite=\MSsilent

```

Index

Numbers written in *italic* refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in *roman* refer to the code lines where the entry is used.
