1 `hssa.cls`: HSSA class file, user documentation

This code is in the file `hssa.cls`.

The documentation is created by running `hssa-documentation.dtx`, which calls `hssa.cls` and `hssa.sty`, etc.

Class file for the HSSA journal.¹

1.1 Documentation for authors

If you are writing with \LaTeX please observe the following guidelines:

- Use Unicode encoding for your files (i.e., for \XeLaTeX or \LuaTeX)
- Use the standard features of \LaTeX as documented in the standard manual, *\LaTeX : A Document Preparation System* by Leslie Lamport, or in *The Very Short Guide to Typesetting with \LaTeX* by Peter Flynn and Silmaril Consultants (part of the \TeX live distribution and at [CTAN](#)).
- Use logical markup, not presentational markup. That means you mark things as `\chapter{xxx}`, `\footnote{xxx}`, `\sanskrit{xxx}`, `\title{xxx}`, etc., and not `\textbf{xxx}`, `\vspace{5ex}`.
- Do not use `\newcommand` or `\def` to make private commands. If this appears to be unavoidable, please contact the journal editor before proceeding.
- Provide your bibliography entries in \BibTeX format. The journal uses \BibLaTeX , which is flexible. So please do not use any special formatting commands or non-standard bst files. Just use `\cite{xxx}` etc. in the simplest manner.
- If you have tables, keep them simple and don't spend time putting in many horizontal and vertical lines. They will be reformatted for the journal, in any case.

The above advice is also given on the [HSSA website](#).

¹See <http://tug.org/pracjourn/2005-3/asknelly/> for a nice statement of the difference between `.cls` and `.sty` files.

1.2 Documentation for L^AT_EX hackers converting incoming files to HSSA

1.2.1 Prelims

Start off each HSSA article L^AT_EX file with the following macros:

```
\RequirePackage{snapshot}  
\documentclass{hssa}  
\usepackage{hssa}  
\addbibresource{\jobname.bib}
```

Note that the article's bibliography should have the same name as the article, with the extension .bib.

1.2.2 Metadata

Next, use the following commands to capture the metadata for this article:

```
\HSSAissuenum{999}  
\HSSAissuedate{2999}  
\HSSAarticletitle{A Title}  
\HSSAauthorname{A. N. Author}  
\HSSAauthoraddress{University of University}  
\HSSAfirstpage{000}  
\HSSAlastpage{999}  
\DOI{1.2/3.4.5}
```

These commands generate the right text for the front page, the copyright page and the article's title and running header.

If the running header is too long (author's love long titles), use

```
\HSSAshortarticletitle{An abbreviated title}
```

1.2.3 HSSA user macros

Here follow various commands for use in HSSA articles that aren't part of standard L^AT_EX.

`\CE AD, BC, etc.` There are shortcuts for expressing the eras CE and BCE.
`\BCE` These macros also get the fonts right. There are synonyms: use any of the following and the output will look right:

```
\bce
```

\BC
\BCE
%
\ce
\CE
\AD

Don't forget to handle the space after these macros appropriately.

\q Use this to make a loud, obnoxious marginal note in bright yellow box. Use it to annotate the PDF proofs for communicating with the author.

\q{} stands for "query," and is a tailord version of todonotes. In addition to the yellow box in the margin, it can also build a page index of the notes that you can print at the end of the article with \listoftodos.

miniedition (*env.*) **Environments for ślokas and mini-editions** An environment for making apparatus notes to a single śloka or two.

sloka (*env.*) An environment for typesetting Sanskrit verses; pretty much the same as verse.

\MScite **Citing manuscripts** Cite your manuscripts using the pattern "City, Library, accession number." The \MScite macro will print the right thing in your text, while also writing an entry to an alphabetical index of manuscripts that appears at the end of your article. Saying \MScite{London, Wellcome, \$\alpha\$999} will print "MS London, Wellcome α 999 in your text.

\MS \MS is a synonym for \MScite

\MSnocite If you want to put an entry in your index of manuscripts, but you don't want the entry printed in the main text where you're writing, use \MSnocite.

\MSsilent A synonym for \MSnocite.

\saneng **Making a lexical index** If you say \saneng{pūpa}{cake} then you'll get "cake (*pūpa*)" printed in your main text. Also, an entry will be written to a lexical page index, both Sanskrit-English and English-Sanskrit.

\ssaneng \ssaneng is a silent version of the same macro that writes the index entries but puts nothing in the main text.

1.2.4 Language-switching

\textgreek See the documentation for [Polyglossia](#) for details of how these are used.

\textenglish

\textsanskrit

These macros switch to the respective languages and scripts (e.g., Devanagari for `\textsanskrit{}`).

`\dev` `\dev` is just an abbreviation for the `\textsanskrit` macro.

`\cjk` This is just a switch, so say `{\cjk X}` where *X* is a Chinese character.

1.2.5 Citation commands

HSSA uses the Bib_{La}T_EX macros, and the Oxref style for formatting according to the Oxford Hart's Rules guidelines. The NatBib conventions are also loaded, so you can use `\cite`, `\citep` `\citet` in the standard ways, as well as Bib_{La}T_EX's `\footcite`, `\cites`, `\parencites`, etc.

Bibliography and index outputs Say `\printbibliography` at the end of the document.

Here are examples from the end of Speziale's 2019 paper that do more elaborate things.

Index prologue

```
\setlength{\shorthandwidth}{.25\textwidth}
```

```
\indexprologue{\centering\emph{References are to page numbers in this
article.}}
```

Index of manuscripts As indexed using `\MScite` etc.

```
\printindex[manuscripts] % ditto for manuscripts
```

```
\printshorthands % uses features of biblatex-manuscripts-philology
[title=Primary Sources in Manuscripts,
type=manuscript,
% env=details,
%sorting=special,
]
```

Index of editions

```
\printshorthands %
[title=Primary Sources in Printed Editions,
keyword=edition, % flagged as such in the bib file
%prenote=blurb01,
```

```
%sorting=special,
]
```

Index of references

```
\printbibliography
[title=Secondary Sources and Translations,
sorting=nyt,
%keyword=secondary,
notkeyword=edition,
nottype=manuscript,
] % keep the editions in the Text Editions section only
```

`\diatop` **Miscellaneous** Puts more than one accent over a letter. This isn't available in standard L^AT_EX, but we philologists sometimes need it. Say, for example, `\diatop[\'|{\o}]` to get \acute{o} .

`\PreliminaryNote` For that zeroth footnote at the beginning of an article that gives acknowledgments or abbreviations. I prefer to put this material at the end of an article, in a section called "Acknowledgements."

`rotating (env.)` **Rotating pages for big tables and figures** That's pretty much it. You might want to add `\usepackage[figuresright]{rotating}` if you have some tables to go sideways.

`\section` **Standard L^AT_EX sectioning and similar commands** Just use the normal `\section{}` commands, down to `\paragraph`.

`\lettrine` The first line after a section is formatted with an initial drop-cap and small caps, using `\lettrine`. The three arguments are 1. line-drop and over height (always the same), 2. the drop-capital itself, and 3. the remaining letters of the word and some more words up to the end of a phrase. For example

```
\lettrine[lines=2,loversize=.1]{T}{he} object of this contribution is ...
```

How much you include in the phrase is up to you. E.g.,

```
\lettrine[lines=2,loversize=.1]{T}{he object of this contribution} is ...
```

Note that *all* the letters of the phrase should be lowercase. They will be turned into small caps, and uppercase letters won't look right. E.g.,

```
\lettrine[lines=2,loversize=.1]{T}{he mahābhārata and the rāmāyana both feature kṛṣṇa  
%% ...
```

1.2.6 What you get for nothing

In addition to setting up the above commands, the class and style files below will handle the

- colour and layout of the front and back matter,
- the title and section headings,
- the running headers and footers,
- the two-column footnotes
- the use of T_EX Gyre Pagella or other Unicode font in T_EX math mode.

2 hssa.cls: HSSA class file, macro definitions

This code is in the file `hssa.cls`.

See <http://tug.org/pracjourn/2005-3/asknelly/> for a nice statement of the difference between `.cls` and `.sty` files. Here in `hssa.cls`, I'm keeping the code that is part of the core of HSSA's design. I would not expect to change things here much after 2019.

`\NeedsTeXFormat` Declare that we are using the main L^AT_EX2e format.

```
1 \NeedsTeXFormat{LaTeX2e}
```

`\LoadClass` HSSA is based on an 11pt article style:

```
2 \LoadClass[11pt]{article}
```

`\RequirePackage` Here come the packages that HSSA assumes are present.

```
3 \usepackage{hssa-indexing} % has to be loaded before hyperref
4 \RequirePackage{ %
5   graphicx,
6   amsmath,
7   amsfonts,
8   amssymb,
9   textcomp, % arcane LaTeX/NFSS system for subsetting encodings. Needed for
10  % Sigma.
11  metalogox, % for the XeTeX logo etc.
12  wasysym,
13  hyperref,
14  hyperxmp, % to embed XMP metadata in the PDF
15  geometry,
16  array,
17  longtable,
18  polyglossia, % polyglossia calls fontspec
19  multicol,
20  booktabs, % better table spacing, \toprule etc.
21  textcase, % to get \MakeTextLowercase for tweaking the running footer
22  fancyhdr,
23  hssa-biblatex, % bibliography management and formatting
24 }
```

`xcolor` Settings for the `xcolor` package

```
25 \RequirePackage[xetex,
26   dvipdfmx,
27   svgnames,
28   table]
29   {xcolor}
```

`enumitem` To control the spacing around itemized lists.

```
30 \usepackage{enumitem} % supersedes mdwlist: does it globally
31 \setlist{noitemsep,
32   %labelindent=\parindent,
33   %leftmargin=*,
34 }
```

`\q` Issue notes to the author in the margins of the page proofs. It uses the `todonotes` package.

Define `\q` to be `\empty` for the final run to suppress the display of notes. Put a `\newpage \listoftodos` just before `\end{document}` to help the author with an indexed list to the marginal notes.

```
35 \setlength{\marginparwidth}{2cm} %todonotes manual, section 1.6.5
36 \usepackage[colorinlistoftodos,
37 %   disable,
38 %textsize=small,
39 loadshadowlibrary,
40 shadow,
41 backgroundcolor=yellow]{todonotes}
42 \setuptodonotes{fancyline}
43 %
44 \newcommand{\q}[1]{{}\todo{\footnotesize #1}{}}
```

`\PreliminaryNote` A preliminary numberless “footnote” for abbreviations, grant references, and other general initial statements. But commonly, put this in a little “Acknowledgements” section at the end of the paper.

```
45 \newcommand{\PreliminaryNote}[1]{%
46   {\def\thefootnote{\relax }%
47     \footnotetext{\hspace*{-2.3em} %only if not using \hangfootnotes
48       #1}}}
49 %
50 %DW ?
51 \skip\footins=24pt
52 %DW ?
```

2.1 Set the geometry for the pages

`geometry` Set the geometry for the pages DW

```
53 \geometry{twoside,
54   paperwidth=210mm,
55   paperheight=297mm,
56   textheight=562pt,
57   textwidth=384pt,
```

```

58 centering,
59 headheight=30pt,
60 headsep=18pt,
61 footskip= 42pt, %24pt,
62 footnotesep=24pt plus 2pt minus 12pt,
63 }

```

2.2 Front matter

```

\title I thought about doing something like this:
\author \newenvironment{frontmatter}{}{\maketitle}
\date but then gave that up.

\title
64 \title{\LARGE \@HSSAarticletitle }

\author Put the author's address in a parbox because it may have hard linebreaks
(\\) that can cause trouble. This happened in Speziale 2019. I still don't
know why the linebreak is allowed after the authorname but not in the ad-
dress.
65 \author{\@HSSAauthorname\\ [1ex]
66 \parbox{\textwidth}{\small\centering\emph{\@HSSAauthoraddress}}
67 }

\date No date.
68 \date{\relax }

```

2.3 Running headers and footers

```

\HSSAfooter Variable that collects the text for the footer.
69 \def\HSSAfooter#1 %*%
70 {\gdef\@HSSAfooter{#1}}

\@HSSAtitle Define the title for use on the title page.
71 \newcommand{\@HSSAtitle}{History of Science in South Asia}

\HSSAverso Variable that collects the page header of the verso pages.
72 \def\HSSAverso#1{\gdef\@HSSAverso{#1}}

\HSSArecto Ditto for the recto, and initialize them both to nothing.
73 \def\HSSArecto#1{\gdef\@HSSArecto{#1}}
74 \let\@HSSAverso\@empty
75 \let\@HSSArecto\@empty

```

Now the HSSA journal running headers, footers and cover citation. Set the shorttitle to be the same as \HSSAverso unless the author redefines it in the document preamble.

```
76 \HSSAverso{\@HSSAarticletitle }
77 \let\HSSAshorttitle\HSSAverso
78 \HSSArecto{\@HSSAauthorname }
```

\@HSSAheaderfooterfont Set up the font that will be used for running headers and footers. Small caps, and a bit of extra space, 7%, of the font's point size, between each letter (LetterSpace is from fontspec).

```
79 \def\@HSSAheaderfooterfont{\scshape\addfontfeature{LetterSpace=7}}
```

\HSSAfooter Use the \MakeTextLowercase macro from the textcase package and construct the running footer for each page.

```
80 \HSSAfooter{\MakeTextLowercase{\@HSSAtitle}\ \@HSSAissuenum\
81 (\@HSSAissuedate) \thefirstpage--\thelastpage}
```

2.4 Fancy headers and footers

Now the fancy header setup, which should be done after the geometry setup.

```
82 %\usepackage{fancyhdr} % after the geometry setup
83 \pagestyle{fancy}
84 \fancyhead{}
85 \fancyhead[C]{\textenglish{\@HSSAheaderfooterfont\MakeTextLowercase{\@HSSArecto}}}
86 \fancyhead[CE]{\textenglish{\@HSSAheaderfooterfont\MakeTextLowercase{\@HSSAverso}}}
87 \fancyhead[RO]{\textenglish{\@HSSAheaderfooterfont\thepage}}
88 \fancyhead[LE]{\textenglish{\@HSSAheaderfooterfont\thepage}}
89 \fancyfoot[L]{}
90 \fancyfoot[C]{\textenglish{\@HSSAheaderfooterfont\HSSAfooter}}
91 \fancyfoot[R]{}
92 \renewcommand{\headrulewidth}{0pt}
93 \renewcommand{\footrulewidth}{0pt}
```

2.5 Fancy-plus-DOI style

\fancypage Make a style for the first page that has the DOI in the bottom right

```
94 \fancypagestyle{fancy-plus-DOI}{%
95 \fancyhead{}
96 \fancyhead[R]{}
97 \fancyfoot[L]{\copy\cclogobox \tiny\textenglish{\@HSSAheaderfooterfont
98 \href{http://doi.org/\@DOI}{doi: \@DOI}}}
```

```

99    \fancyfoot[C]{\textenglish{\@HSSAheaderfooterfont\@HSSAfooter}}
100   \fancyfoot[R]{}
101 }

```

2.6 Link colours

`\definecolor` This is the colour that will be used for the URL links; it's dark, so that it doesn't disturb the reading as much as the standard blue would do. It depends on the `xcolor` package.

```
102 \definecolor{darkbrown}{rgb}{0.4, 0.26, 0.13} % from http://latexcolor.com/
```

2.7 Output the preliminary matter

These commands depend on `hyperref`, but that is always loaded so there's no need to check.

```

\AtBeginDocument
103 \AtBeginDocument{%
104   \coverpage
105   \copyrightspage
106   %
107   \setcounter{page}{0}
108   \maketitle
109   \thispagestyle{fancy-plus-DOI}
110   \setcounter{page}{\thefirstpage}
111 %
112   \def\@linkcolor{darkbrown}
113   \def\@anchorcolor{darkbrown}
114   \def\@citecolor{darkbrown}
115   \def\@filecolor{darkbrown}
116   \def\@urlcolor{darkbrown}
117   \def\@menucolor{darkbrown}
118   \def\@pagecolor{darkbrown}
119 %
120   \selectbackgroundlanguage{english}
121 }

```

It would have been convenient to `\input{sanskrit-hyphenations}` at this too, but for some reason this doesn't work. These hyphenations have to be `\input` after `\begin{document}`.

2.8 Output the final pages that come after the article

```
\AtEndDocument
```

```

122 \AtEndDocument{%
123     \newpage
124     \coverlastpage
125 }

```

2.9 Arrange the appendix

appendix

```

126 % Consider using \RequirePackage[title]{appendix}
127 %
128 \def\appendixname{Appendix}
129 \renewcommand\appendix{\par
130     \setcounter{section}{0}%
131     \setcounter{subsection}{0}%
132     \setcounter{equation}{0}
133     \addtocontents{toc}{\string\let\string\numberline\string\tmptocnumberline}{}}
134 }

```

Last page Define the last page number and set it to 100

```

135 \def\LastPage#1{\gdef\@LastPage{#1}}
136 \LastPage{100}

```

2.10 Set up the alignment and fonts of title and author names

```

\aufont
\titlefont 137 \def\titlealign#1{\gdef\@titlealign{#1}}
\footerfont 138 \let\@titlealign\centering
\footeraddress 139 \def\aualign#1{\gdef\@aualign{#1}}
140 \let\@aualign\centering
141 \def\titlefont#1{\gdef\@titlefont{#1}}
142 \def\aufont#1{\gdef\@aufont{#1}}
143 \def\@titlefont{\fontsize{20}{24}}
144 \def\@aufont{\fontsize{10}{12}}
145 %
146 % Footer font
147 %
148 \def\footerfont#1{\gdef\@footerfont{#1}}
149 \footerfont{\fontsize{7}{8}}
150 %
151 % Footer address
152 %
153 \def\footeraddress#1{\gdef\@footeraddress{#1}}
154 \let\@footeraddress\@empty

```

2.11 The content of the cover page

\coverpage

```
155 \long\def\coverpage{%
156     \thispagestyle{empty}
157     \begingroup
158     \parindent0pt

454 % \advance\leftskip 2em
455 % \advance\rightskip 2em
456 %\narrower
457 }
458 {\relax }

```

2.26 Diatop

\diatop \diatop, used for r underdot overbar (ṛ, F6, 246) See Conference Proceedings, *TeXniques* no. 5, p. 11.

```

459 \def\diatop[#1|#2]{\leavevmode{\setbox1=\hbox{#1}}\setbox2=\hbox{#2}}%
460 \dimen0=\ifdim\wd1>\wd2\wd1\else\wd2\fi%
461 \dimen1=\ht2\advance\dimen1by-1ex%
462 \setbox1=\hbox to1\dimen0{\hss#1\hss}%
463 \rlap{\raise1\dimen1\box1}%
464 \hbox to1\dimen0{\hss#2\hss}}%

```

E.g. of use: \diatop[\ ' | {\=o}] gives o macron acute.

2.26.1 Unknown

Again, what's this? "get rid of the alphabetic headers"?

```

465 \newcommand{\lettergroup}[1]{\smallskip }

```

2.27 Mini edition environment

miniedition Documented at [the Cikitsā blog](#).

First make a hanging footnote setup to use for these minipage notes:

```
466 % nice hanging-indent footnotes. LaTeX Companion, p.73:
467 \def\hangfootnotes{%
468     \renewcommand{\@makefnmark}[1]{\setlength{\parindent}{0pt}%
469         \begin{list}{}{\setlength{\labelwidth}{1.5em}%
470             \setlength{\leftmargin}{\labelwidth}%
471             \setlength{\labelsep}{3pt}\setlength{\itemsep}{0pt}%
472             \setlength{\parsep}{0pt}\setlength{\topsep}{0pt}%
473             \footnotesize\item[\hfill\@makefnmark]##1%
474         \end{list}}%
475 }

476 \newenvironment{miniedition}
477     {\begin{quote}
478         \addtolength{\textwidth}{-2\rightmargin} % width of the quote environment
479         \begin{minipage}{\textwidth}
480             \let\footnoterule\relax % if you want a rule, comment out this line.
481             \hangfootnotes
482             % \let\footnote\originalfootnote
483         }
484     {\end{minipage}
485     \end{quote}
486 }
```

Resetting `\footnote` to `\originalfootnote` is no longer needed. Standard non-reledmac L^AT_EX footnotes are now restored by the `\@minipagerestore` hook in the file `hssa-reledmac.sty`.

2.28 Index of Manuscripts

`\MScite` The command `\MScite` is defined in `hssa-indexing.sty` that is loaded earlier in this file.

Usage:

```
\MScite{City Library Accession no.}
\MScite{London Wellcome Indic alpha 23}
\printindex[manuscripts]
```

3 hssa.sty: HSSA main style file

This code is in the file `hssa.sty`. Style file for the HSSA journal.² Here in `hssa.sty`, I'm keeping the code that is not part of the core of HSSA's design, including calls to other style files that might or might not be included for different articles.

3.1 Load basic macros for reledmac

`hssa-reledmac (env.)` We load `reledmac.sty` with some parameters set in the file `hssa-reledmac.sty`. This redefines `\footnote` to produce double-column notes. Also, it makes the macros of `reledmac` available for making critical editions.

```
487 \usepackage{hssa-reledmac} % journal home style, two-col footnotes
```

For some documents without the need for critical edition features, it may be enough to use `dblfnote.sty` instead.

Note: we don't load `hssa-biblatex` here because it is already loaded in `hssa.cls`; it's a permanent feature of HSSA.

3.2 Languages and fonts, Polyglossia-style

3.2.1 British English, Greek, Sanskrit

```
488 \setdefaultlanguage[variant=british]{english}
489 %\setotherlanguage{japanese} % still experimental in Polyglossia
490 \setotherlanguage{greek}
491 \setotherlanguage{sanskrit}
```

3.2.2 T_EX Gyre Pagella, the default roman font for HSSA

```
492 \setmainfont[Ligatures=TeX,
493 Mapping=tex-text,
494 Numbers=OldStyle]{TeX Gyre Pagella}
495 %\setmainfont[Scale=1.05]{Alegreya} % quite nice; superscripts not smaller
496 %\setmainfont{Libertinus Serif} % looks good; does math
```

3.2.3 Sanskrit input in Devanagari script

```
497 \newfontfamily\sanskritfont[Script=Devanagari,
```

²See <http://tug.org/pracjourn/2005-3/asknelly/> for a nice statement of the difference between `.cls` and `.sty` files.

```

498 %Mapping=RomDev,
499 FakeStretch=1.08, % improves Sanskrit 2003
500 AutoFakeBold=1.5,
501 ]
502 {Sanskrit 2003}
503 % {Murty Sanskrit}
504 \let\dn\sanskritfont %for legacy Velthuis-encoded documents

```

3.2.4 Sanskrit input in IAST script, output in Devanagari

```

505 % Sanskrit input in IAST
506 \newfontfamily\devanagarifont[Script=Devanagari,
507 Mapping=RomDev,
508 FakeStretch=1.08, % improves Sanskrit 2003
509 AutoFakeBold=2.5,
510 ]
511 % {Murty Sanskrit}
512 {Sanskrit 2003}
513 \newcommand{\dev}[1]{\devanagarifont#1}}
514 %\newcommand{\dev}[1]{\textdevanagari{#1}}
515 \newcommand{\largesloka}[1]{\raggedright \devanagarifont\large #1\par}}

```

3.2.5 Chinese

```

516 \newfontfamily\cjk[Script=CJK,Mapping=tex-text,Scale=MatchLowercase]
517 %{\IPAexMincho} % missing
518 %{\TakaoPGothic}
519 {Yu Mincho}
520 %

```

3.2.6 Greek font

```

521 % Greek
522 \newfontfamily\greekfont{Gentium Plus}[Script=Greek,
523 Mapping=tex-text,
524 Scale=MatchUppercase]
525 %
526 %{\Old Standard}
527 %{\GFS Porson}
528 %{\GFS Didot}
529 %{\Galatia SIL}
530 %{\Linux Libertine O}

```

See [Stackexchange about Greek fonts](#).

3.3 Local generic author-facing macros

```

\bce
\ce
\BCE
\CE

```

```

531 \def\bce{\textsc{bce}} % I took out the final \xspace
532      % because it's behaviour is hard to predict - DW
533 \def\ce{\textsc{ce}} % ditto.
534 \let\BC\bce \let\BCE\bce \let\AD\ce \let\CE\ce

```

3.4 Math mode with Unicode fonts

```

535 \usepackage{unicode-math} % must load after amsmath; see manual ch. 3
536 %\setmathfont{texgyrepagella-math.otf} % doesn't have old style numerals.
537 \setmathfont{Asana Math}[Numbers=OldStyle]

```

4 hssa-reledmac.sty: critical edition and footnote column macros

This code is in the file `hssa-reledmac.sty`.

4.1 Two-column footnote formatting

With help from [EDMAC](#) and [Stackexchange](#).

```
538 \usepackage[nocritical,
539     noend,
540     %noeledsec,
541     %noledgroup,
542     series={A, B, C, D, E, F, G, H, I}]{reledmac}
543 \usepackage{setspace}
544 %\let\footnoteruleA=\relax % do we want a footnoterule?
545 \def\thempfootnote{{\itshape\@alph\c@mpfootnote}} % from latex.ltx
546 \arrangementX[A]{twocol}
547 \arrangementX[B]{twocol} % for occasional use in the \verb|miniedition| environment
548 \colalignX{\relax } % looks better. But should we optimize narrow columns
549 %by going \verb"\raggedright"?
550 \beforenotesX{2em plus 1.5em minus 1.5em} % spacing above notes
551 \renewcommand*{\normalfootfootmarkX}[1]{%
552     \@nameuse{@thefnmark#1}\hspace*{.5em}}
```

`\footnote` `\footnote` is not going to be the standard L^AT_EX footnote. So store the standard version. Then restore the standard `\footnote` when inside minipage environment.

Finally, make the command `\footnote` into the `reledmac` two-column command.

```
553 \let\originalfootnote=\footnote % store this for use in minipages
554 \def\@minipagerestore{\let\footnote\originalfootnote} % restore standard \footnote
555 % Now change \verb"\footnote" to the reledmac version:
556 \let\footnote=\footnoteA
```

[Stackexchange help](#). Commented out, but useful in some tight situations:

```
557 % \usepackage{microtype}
```

5 hssa-biblatex.sty: Bib \LaTeX settings for HSSA

This code is in the file `hssa-biblatex.sty`.

5.1 Manuscript-oriented Bib \LaTeX macros

We don't need this at present. It's only here as a place-keeper, as a starting point in case we have a document that requires lots of specialized bibliographies for manuscripts, e.g., perhaps a manuscript catalogue.

```
558 % \usepackage[%  
559 % tools={manuscripts},  
560 % bibstyle={authoryear},  
561 % ]{biblatex-multiple-dm} % for biblatex-manuscripts-philology
```

5.2 Load Biblatex

Here are the macros for our bibliographies. HSSA uses *New Hart's Rules* (Oxford University Press, 2014) as its formatting style guide. These Rules are comprehensively implemented for Bib \LaTeX through the `oxref` and `oxyear` packages. See also section 5.3 below.

```
562 \usepackage[%  
563 backend=biber,  
564 %bibstyle=multiple-dm, % for biblatex-manuscripts-philology  
565 % oxref:  
566 style=oxyear,  
567 dashed=true,  
568 usetranslator=true,% see oxref documentation para 2.1.10  
569 %ibidtracker=constrict,  
570 %ibidpage=false,  
571 %pagetracker=page,  
572 %idemtracker=constrict,  
573 sorting=ynt,
```

(on `ynt`, see [Cikitsā blog post](#).)

```
574 sortcites=true,  
575 backref=false,  
576 date=comp,  
577 datecirca=true,  
578 dateuncertain=true,  
579 bibencoding=auto,  
580 hyperref=auto,  
581 isbn=true,  
582 doi=true,
```

```

583 language=auto,
584 natbib=true,
585 texencoding=auto,
586 url=true,
587 urldate=short,
588 useprefix=true,
589 %refsection=section,
590 giveninits=false,
591 maxbibnames=10]{biblatex}

```

5.3 Settings for oxyear

```

592 \ExecuteBibliographyOptions[% for biblatex-oxyear
593 book,
594 mvbook,
595 mvcollection,
596 inbook,
597 incollection,
598 inreference,
599 collection,
600 reference,
601 mvreference]{useeditor=true,usetranslator=true}
602 \AtBeginDocument{\assignrefcontextentries[]{*}}

```

See [Cikitsā blog post](#) for further explanation of the above.

5.4 Bibliography punctuation

Following sections 3.10 and 4.7.5 of the Bib_{La}T_EX manual, put the comma *inside* the quotation marks of the title.

```

603 \DefineBibliographyExtras{british}{\DeclareQuotePunctuation{.,}}

```

5.5 Bibliography sorting

To avoid saying `\newrefcontext[sorting=nyt]` before `\printbibliography` in every document redefine `\printbibliography` (from `biblatex.sty`):

```

604 \renewrobustcmd*{\printbibliography}{%
605   \newrefcontext[sorting=nyt] % added this line
606   \begingroup
607   \delimcontext{bib}%
608   \edef\on@line{\on@line}%
609   \@ifnextchar[%

```

```

610     {\blx@printbibliography}
611     {\blx@printbibliography[]}
612 }

```

5.6 Positioning of the notes

To make bibtex notes print last, like addendums from [Stackexchange](#).

```

613 \DeclareSourceMap{
614     \maps[datatype=bibtex]{
615         \map{
616             \step[fieldsource=note, final]
617             \step[fieldset=addendum, origfieldval, final]
618             \step[fieldset=note, null]
619         }
620     }
621 }

```

5.7 csquotes

The american option with csquotes gives double quotes in article titles in the bibliography.

```

622 \usepackage[style=american]{csquotes}

```

5.8 Tweak the citation style

Remove the “p.” and “pp.” from, for example, \volcite :

```

623 \DefineBibliographyStrings{english}{%
624     page          = {},
625     pages          = {},
626     volume = {vol},
627     volumes = {vols},
628 }

```

5.9 Unused code

Biblatex documentation 4.11. and macros from biblatex.def Enable hot URLs for PDFs at Archive.org and Academia.edu etc.

Make URLs smaller:

```

629 %\DeclareFieldFormat{url}{\textsc{url:} {\small \href{#1}{\nolinkurl{#1}}}}
630 %\DeclareFieldFormat{doi}{\textsc{doi:} {\small \href{#1}{\nolinkurl{#1}}}}

```

5.10 URL formatting in the bibliography

5.10.1 Buddhist Digital Resource Center

```
631 \DeclareFieldFormat{eprint:tbrc}{%
632   \textsc{TBRC}\space
633   \ifhyperref
634     {\href{https://www.tbrc.org/\#!rid=#1}{\nolinkurl{#1}}}
635   {\nolinkurl{#1}}}
```

5.10.2 ARK

```
636 \DeclareFieldFormat{eprint:ark}{%
637   \textsc{ark:}\space
638   \ifhyperref
639     {\href{https://n2t.net/#1}{\nolinkurl{#1}}}
640   {\nolinkurl{#1}}}
```

5.10.3 Archive.org

```
641 \DeclareFieldFormat{eprint:archive}{%
642   Internet Archive\addcolon\space
643   \ifhyperref
644     {\href{http://archive.org/details/#1}{\nolinkurl{#1}}}
645     {\nolinkurl{#1}}}
646 \DeclareFieldAlias{eprint:archiveorg}{eprint:archive}
```

5.10.4 Academia.edu

```
647 \DeclareFieldFormat{eprint:academia}{%
648   Academia.edu\addcolon\space
649   \ifhyperref
650     {\href{http://www.academia.edu/#1}{\nolinkurl{#1}}}
651     {\nolinkurl{#1}}}
652 \DeclareFieldAlias{eprint:academia.edu}{eprint:academia}
```

5.10.5 JSTOR

```
653 \DeclareFieldFormat{eprint:jstor}{%
654   \ifhyperref
655     {\href{http://www.jstor.org/stable/#1}{\small JSTOR}}}
656     {\nolinkurl{#1}}}
```

5.10.6 Jainelibrary

```
657 \DeclareFieldFormat{eprint:jainlibrary}{%
658   Jain eLibrary\addcolon\space
659   \ifhyperrefsloka
660     {\href{http://www.jainlibrary.org/book.php?file=#1}{\nolinkurl{#1}}}
```

```
661 {\nolinkurl{#1}}}
```

5.10.7 DOI

```
662 \DeclareFieldFormat{doi}{%
663   \textsc{doi}\addcolon\space
664   \ifhyperref
665     {\href{https://doi.org/#1}{\nolinkurl{#1}}}
666     {\nolinkurl{#1}}}
```

5.11 Tweaks to make the citation form:- Author date: page

```
667 \DeclareFieldFormat{postnote}{#1}
668 \renewcommand{\postnotedelim}{: \,}
669 \renewcommand{\nameyear delim}{ }
```

5.12 “Forthcoming” hacks

Biblatex hacks to get pubstate (“forthcoming” etc.) behaving as it should
Biblatex manual 4.5.10

```
670 \DeclareLabeldate{%
671   \field{date}
672   \field{year}
673   \field{pubstate}
674   \field{eventdate}
675   \field{origdate}
676   \field{urldate}
677   \literal{nodate}
678 }
```

5.13 Tighten up URL date

```
679 \DeclareFieldFormat{urldate}{%
680   (on
681   \thefield{urlday}\addspace%
682   \mkbibmonth{\thefield{urlmonth}}\addspace%
683   \thefield{urlyear})\isdot}
```

5.14 Hyperlink magic

Some magic from “moewe” at [Stackexchange](#) that makes hyperlinks work
from citations to a list of abbreviations.

```
684 \DeclareFieldFormat{shorthandwidth}{%
685   \bibhypertarget{shorthand:\thefield{entrykey}}
686   {#1}}
687
688 \DeclareFieldFormat{bibhyperref}{%
```

```

689 \iffieldundef{shorthand}
690 {\bibhyperref{#1}}
691 {\bibhyperlink{shorthand:\thefield{entrykey}}{#1}}

```

Patch so that date-abbreviations aren't just one digit. Kindly supplied by Alex Ball, <https://github.com/alex-ball/biblatex-oxref/issues/19>

```

692 \renewcommand{\blx@ox@compyear}[2]{%
693   \def\num@one{#1}%
694   \def\num@two{#2}%
695   \StrLen{\num@one}[\num@one@len]%
696   \StrLen{\num@two}[\num@two@len]%

709     \StrGobbleLeft{0\num@two}{\Result}%
710   }{\num@two}}

```

TeX stops reading here.

6 hssa-indexing.sty: indexing for HSSA

This code is in the file hssa-indexing.sty.

Formerly used xindy; now updated to use xindex

Now (2023) see the package indextools by Maïeule Rouquette (<https://github.com/maieul/indextools>) that patches imakeidx to work with bidi.

```
711 %\usepackage[imakeidx]{xindex} % deprecated by indextools
712 \usepackage[xindex]{indextools}
713 % \PassOptionsToPackage{nonewpage}{imakeidx}
714 %
715 \indexsetup{level=\section*,
716   noclearpage,
717   firstpagestyle=fancy
718 }
719 %
720 \makeindex[name=lexical,
721 title=Lexical Index,
722 columns=3,
723 options= --config iast --no_casesensitive --noheadings, % nocasesensitive,
724 %noheadings
725 ]
726 %
727 \makeindex[name=manuscripts,
728 title=Index of Manuscripts,
729 options= --config iast --no_casesensitive --noheadings,
730 columns=1]
731 %
```

Before the \printindex command say
“\indexprologue{References are to page numbers.}”

6.1 English-Sanskrit indexes

Command for English words to be followed by Sanskrit in parentheses, and both to be sent to the lexical index.

```
\saneng
732 \newcommand{\saneng}[2]
733 % #1 = Sanskrit
734 % #2 = English
735 {#2 (\sansk{#1})%
736   \index[lexical]{#2!#1@\emph{#1}}%
737   \index[lexical]{#1@\emph{#1}!#2}}
```

`\ssaneng` A “silent” version of `\saneng` that sends items to the index but prints nothing in the main text.

```
738 \providecommand{\ssaneng}[2]% silent index entry
739 % #1 = Sanskrit
740 % #2 = English
741 {\index[lexical]{#2!#1@\emph{#1}}}%
742   \index[lexical]{#1@\emph{#1}!#2}}
```

Tidy up the index spacing:

```
743 \renewcommand\@idxitem{\par\hangindent 15\p@ }% from sanmed.sty
```

6.2 Commands for citing and indexing manuscripts

`\MS` To cite manuscripts in canonical form, use the following structure
`\MScite <City> <Library> <Shelf number>`.
E.g.,

```
\MS{London Wellcome  $\beta$  33}
```

(`\MS` is shorthand for `\MScite`.) This prints “MS London Wellcome β 33” in the text and also sends entries to your index of manuscripts, that will be printed at the end of your article with `\printindex[manuscripts]`.

```
744 \newcommand{\MScite}[1]{MS #1\index[manuscripts]{#1}}
745   \let\MS=\MScite
```

`\MSnocite` And a silent version. This sends an entry to the index but prints nothing in the main text (works like `\nocite`):

```
746 \newcommand{\MSnocite}[1]{\index[manuscripts]{#1}}
747   \let\MSsilent=\MSnocite
```

Index

Numbers written in *italic* refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in *roman* refer to the code lines where the entry is used.
