1 Documentation for authors using LATEX

If you are writing with LATEX please observe the following guidelines:

- Use Unicode encoding for your files (i.e., for XeIATEX or LuaTEX)
- Use the standard features of LATEX as documented in the standard manual, LATEX: A Document Preparation System by Leslie Lamport, or in The Very Short Guide to Typesetting with LATEX by Peter Flynn and Silmaril Consultants (part of the Textilive distribution and at CTAN).
- Use logical markup, not presentational markup. That means you
 mark things as \chapter{xxx}, \footnote{xxx}, \sanskrit{xxx},
 \title{xxx}, etc., rather than \textbf{xxx}, \vspace{5ex}, or
 \emph{xxx}.
- Do not use \newcommand or \def to make private commands. If this
 appears to be unavoidable, please contact the journal editor before
 proceeding.
- Provide your bibliography entries in BibTeX format. The journal uses BibLaTeX, which is flexible. So please do not use any special formatting commands or non-standard bst files. Just use \cite{xxx} etc. in the simplest manner.
- If you have tables, keep them simple and don't spend time putting in many horizontal and vertical lines. They will be reformatted for the journal, in any case.

The above advice is also given on the HSSA website, https://journals.library.ualberta.ca/hssa/index.php/hssa/latex-users.

2 Documentation for LATEX hackers converting incoming files to HSSA

2.1 Prelims

Start off each HSSA article LATEX file with the following macros:

```
\RequirePackage{snapshot}
\documentclass{hssa}
\usepackage{hssa,
hssa-biblatex}
\addbibresource{\jobname.bib}
```

Note that the article's bibliography should have the same name as the article, with the extension .bib.

2.1.1 Metadata

Next, use the following commands to capture the metadata for this article:

```
\HSSAissuenum{999}
\HSSAissuedate{2999}
\HSSAarticletitle{A Title}
\HSSAauthorname{A. N. Author}
\HSSAauthoraddress{University of University}
\HSSAfirstpage{000}
\HSSAlastpage{999}
\DOI{1.2/3.4.5}
```

2.2 User macros

Here follow various commands for use in HSSA articles that aren't part of standard LATEX.

2.2.1 AD, BC, etc.

\CE There are shortcuts for expressing the eras CE and BCE. These macros \BCE also get the fonts right. There are synonyms: use any of the following and the output will look right:

```
\bce
\BC
\BCE
%
\ce
```

\CE \AD

Don't forget to handle the space after these macros appropriately.

Use this to make a loud, obnoxious marginal note in bright yellow box.
Use it to annotate the PDF proofs for communicating with the author.

2.2.2 Environments for ślokas and mini-editions

miniedition

An environment for making apparatus notes to a single śloka or two.

An environment for typesetting Sanskrit verses; pretty much the same as verse.

2.2.3 Citing manuscripts

\MScite

Cite your manuscripts using the pattern "City, Library, accession number." The \MScite macro will print the right thing in your text, while also writing an entry to an alphabetical index of manuscripts that appears at the end of your article. Saying \MScite{London, Wellcome, \$\alpha\$999} will print "MS London, Wellcome α 999 in your text.

\MS

\MS is a synonym for \MScite

\MSnocite

If you want to put an entry in your index of manuscripts, but you don't want the entry printed in the main text where you're writing, use \MSnocite.

\MSsilent

A synonym for \MSnocite.

2.2.4 Making a lexical index

\saneng

If you say $\sin eq {p\bar{u}pa} {cake}$ then you'll get "cake $(p\bar{u}pa)$ " printed in your main text. Also, an entry will be written to a lexical page index, both Sanskrit-English and English-Sanskrit.

\ssaneng

\ssaneng is a silent version of the same macro that writes the index entries but puts nothing in the main text.

2.2.5 Language-switching

\textgreek \textenglish

These macros switch to the respective languages and scripts (Devanagari for \textsanskrit{}).

\textsanskrit

An abbreviation for \textsanskrit

\dev \cjk This is just a switch, so say {\cjk X} where X is a Chinese character.

2.2.6 Citation commands

HSSA uses the BibLATEX macros, and the Oxref style for formatting according to the Oxford Hart's Rules guidelines. The NatBib conventions are also loaded, so you can use \cite, \citep \citet in the standard ways, as well as BibLATEX's \footcite, \cites, \parencites, etc.

2.2.7 Bibliography and index outputs

Say \printbibliography at the end of the document.

Here are examples from the end of Speziale's 2019 paper that do more elaborate things.

```
\setlength{\shorthandwidth}{.25\textwidth}
\indexprologue{\centering\emph{References are to page numbers in this
 article.}}
\printindex[manuscripts] % ditto for lexical
\printshorthands % uses features of biblatex-manuscripts-philology
[title=Primary Sources in Manuscripts,
type=manuscript,
% env=details,
%sorting=special,
\printshorthands %
[title=Primary Sources in Printed Editions,
keyword=edition, % flagged as such in the bib file
%prenote=blurb01,
%sorting=special,
\printbibliography
[title=Secondary Sources and Translations,
sorting=nyt,
%keyword=secondary,
notkeyword=edition,
nottype=manuscript,
] % keep the editions in the Text Editions section only
```

2.2.8 Miscellaneous

\diatop Puts more than one accent over a letter. This isn't available in stan-

dard LATeX, but we philologists sometimes need it. Say, for example, $\diatop[\'|\{\bar{o}\}]$ to get \acute{o} .

\PreliminaryNote

For that zeroth footnote at the beginning of an article that gives acknowledgments or abbreviations. I prefer to put this material at the end of an article, in a section called "Acknowledgements."

rotating

That's pretty much it.

You might want to add \usepackage[figuresright]{rotating} if you have some tables to go sideways.

2.3 What you get for nothing

In addition to setting up the above commands, the class and style files below will handle the

- colour and layout of the front and back matter,
- the title and section headings,
- the running headers and footers,
- the two-column footnotes
- the use of TEX Gyre Pagella or other Unicode font in TEX math mode.

3 Macros in the class file for the HSSA journal: hssa.cls

This is hssa.cls by Dominik Wujastyk, a class file for the HSSA journal.

This documentation is created by running hssa-documentation.dtx, which calls hssa.cls and hssa.sty.

See http://tug.org/pracjourn/2005-3/asknelly/ for a nice statement of the difference between .cls and .sty files. Here in hssa.cls, I'm keeping the code that is part of the core of HSSA's design. I would not expect to change things here much after 2019.

\NeedsTeXFormat Declare that we are using the main LATEX2e format.

1 \NeedsTeXFormat{LaTeX2e}

\LoadClass HSSA is based on an 11pt article style:

hyperref,

svgnames]

{xcolor}

24

25

26

2 \LoadClass[11pt]{article}

\RequirePackage Here come the packages that HSSA assumes are present.

```
3 \RequirePackage{ %
4
      graphicx,
      amsmath,
5
6
      amsfonts,
7
      amssymb,
      textcomp, % arcane LaTeX/NFSS system for subsetting encodings. Needed for Sigma.
      wasysym,
9
      polyglossia,
10
11
      hyperref,
12
      hyperxmp, % to embed XMP metadata in the PDF
      geometry,
13
14
      array,
      longtable,
15
      polyglossia, % polyglossia calls fontspec
16
17
      multicol,
      booktabs, %professional tables \toprule etc.
18
19
      textcase, % to get \MakeTextLowercase for tweaking the running footer
20
      fancyhdr,
21 }
Settings for the xcolor package
22 \RequirePackage[xetex,
      dvipdfmx,
```

```
enumitem
                  27 \usepackage{enumitem} % supersedes mdwlist: does it globally
                  28 \setlist{noitemsep,
                         %labelindent=\parindent,
                  30
                         %leftmargin=*,
                  31 }
              \q issue notes to the author in page proofs. Define \q to be \empty for the
                  final run. Put a \newpage \listoftodos just before \end{document} to
                  help the author.
                  32 \setlength{\marginparwidth}{2cm} %todonotes manual, section 1.6.5
                  33 \usepackage[colorinlistoftodos,
                  34 %
                          disable,
                  35 textsize=tiny,
                  36 shadow,
                  37 backgroundcolor=yellow] {todonotes}
                  39 \left\{ \frac{1}{{}}\right\}
                  Preliminary numberless "footnote" for abbreviations, grant references, and
\PreliminaryNote
                  other general initial statements. But commonly, put this in a little "Ac-
                  knowledgements" section at the end of the paper. DW
                  40 \newcommand{\PreliminaryNote}[1]{%
                         {\def\thefootnote{\relax }%
                  41
                             \footnotetext{\hspace*{-2.3em} %only if not using \hangfootnotes
                  42
                                 #1}}}
                  43
                  44
                  45 %DW ?
                  46 \ship\footins=24pt
                  47 %DW ?
     \HSSAfooter
                  48 \def\HSSAfooter#1 %*%
                           {\gdef\@HSSAfooter{#1}}
     \@HSSAtitle
                  50 \newcommand{\@HSSAtitle}{History of Science in South Asia}
                        Set the geometry for the pages
                  Set the geometry for the pages DW
        geometry
                  51 \geometry{twoside,
                      paperwidth=210mm,
```

```
paperheight=297mm,
            53
                textheight=562pt,
                textwidth=384pt,
            55
                centering,
            57
                headheight=30pt,
                headsep=18pt,
                footskip= 42pt, %24pt,
                footnotesep=24pt plus 2pt minus 12pt,
            61 }
                  Front matter
    \title I thought about doing something like this:
   \author
            \newenvironment{frontmatter}{}{\maketitle}
     \date
            but then gave that up.
    \title
            62 \title{\LARGE \@HSSAarticletitle }
   \author Put the author's address in a parbox because it may have hard linebreaks
            (\\) that can cause trouble. This happened in Speziale 2019. I still don't
            know why the linebreak is allowed after the authorname but not in the
            address.
            63 \author{\@HSSAauthorname\\ [1ex]
                  \parbox{\textwidth}{\small\centering\emph{\@HSSAauthoraddress}}
            65 }
     \date No date.
            66 \date{\relax }
                  Running headers and footers
            Variable that collect the page header of the verso pages.
\HSSAverso
            67 \def\HSSAverso#1{\gdef\@HSSAverso{#1}}
\HSSArecto
            Ditto for the recto, and initialize them both to nothing.
            68 \def\HSSArecto#1{\gdef\@HSSArecto{#1}}
            69 \let\@HSSAverso\@empty
            70 \let\@HSSArecto\@empty
```

Now the HSSA journal running headers, footers and cover citation. Set the shorttitle to be the same as \HSSAverso unless the author redefines it in the document preamble.

```
71 \HSSAverso{\@HSSAarticletitle }
                           \let\HSSAshorttitle\HSSAverso
                        73 \HSSArecto{\@HSSAauthorname }
                       Set up the font that will be used for running headers and footers. Small
\@HSSAheaderfooterfont
                       caps, and a bit of extra space, 7 of the font's point size, between each letter
                        (LetterSpace is from fontspec).
                       74 \def\@HSSAheaderfooterfont{\scshape\addfontfeature{LetterSpace=7}}
          \HSSAfooter
                       Use the \MakeTextLowercase macro from the textcase package and con-
                       struct the running footer for each page.
                       75 \HSSAfooter{\MakeTextLowercase{\@HSSAtitle}\ \@HSSAissuenum\
                              (\@HSSAissuedate) \thefirstpage--\thelastpage}
                           Now the fancy header setup, which should be done after the geometry
                       setup.
                       77 %\usepackage{fancyhdr} % after the geometry setup
                       78 \pagestyle{fancy}
                       79 \fancyhead{}
                       80 \fancyhead[CO] {\textenglish{\QHSSAheaderfooterfont\MakeTextLowercase{\QHSSArecto}}}}
                       81 \fancyhead[CE] {\textenglish{\QHSSAheaderfooterfont\MakeTextLowercase{\QHSSAverso}}}}
                       82 \fancyhead[RO]{\textenglish{\@HSSAheaderfooterfont\thepage}}
                       83 \fancyhead [LE] {\textenglish {\OHSSAheaderfooterfont \thepage}}
                       84 \fancyfoot[L]{}
                       85 \fancyfoot[C]{\textenglish{\OHSSAheaderfooterfont\OHSSAfooter}}
                       86 \fancyfoot[R]{}
                       87 \renewcommand{\headrulewidth}{0pt}
                       88 \renewcommand{\footrulewidth}{0pt}
                       3.4 Fancy-plus-DOI style
                       Make a style for the first page that has the DOI in the bottom right
           \fancypage
                       89 \fancypagestyle{fancy-plus-DOI}{%
                       90 \fancyhead{}
                       91 \fancyhead[R]{}
                       92 %\fancyhead[CO] {\@HSSAheaderfooterfont\@HSSArecto}
                       93 %\fancyhead[CE] {\@HSSAheaderfooterfont\@HSSAverso}
                       94 %\fancyhead[RO] {\thepage}
                       95 %\fancyhead[LE] {\thepage}
                       97 \href{http://doi.org/\@DOI}
                              {doi: \@DOI}}}
                       99 \fancyfoot[C] {\textenglish{\@HSSAheaderfooterfont\@HSSAfooter}}
```

100 \fancyfoot [R] {}

```
101 %\renewcommand{\headrulewidth}{0pt}%
102 %\renewcommand{\footrulewidth}{0pt}%
103 }

\definecolor This is the colour that will be used for the URL links; it's dark, so that it doesn't disturb the reading as much as the standard blue would do.

104 %DW

Usage:

\MScite{London Wellcome Indic alpha 23}
```

4 Style file for HSSA journal: hssa.sty

Style file for the HSSA journal See http://tug.org/pracjourn/2005-3/asknelly/ for a nice statement of the difference between .cls and .sty files. Here in hssa.sty, I'm keeping the code that is not part of the core of HSSA's design, including calls to other style files that might or might not be included for different articles.

4.1 Load basic macros for biblatex and reledmac (footnote cols)

```
499\ \usepackage{hssa-reledmac, % journal home style, two-col footnotes 500\ % hssa-biblatex is already loaded in hssa.cls; can't imagine not needing it. 501\}
```

4.2 Set up the langages and fonts, Polyglossia-style

```
502 \setdefaultlanguage[variant=british] {english}
503 %\setotherlanguage{japanese} % not supported in polyglossia yet
504 \slashed{setotherlanguage{greek}}
505 \setotherlanguage{sanskrit}
